

# Titan X Soundblast

## The Sound Permeable Video Solution

The Titan X for Indochine Tour 2022

The Pure 8 Soundblast combines the transparency of PRGs Pure 10 and PRGs Spaceframe™ into one new versatile product. The Pure 8 Soundblast LED tile is 70% transparent and has the Spaceframe™ system built-in which means this is an extremely light, windproof and tourable product. As an added bonus this means the Pure 8 Soundblast is sound permeable. This makes it possible to completely place and mask the Sound System behind the video screen and can make for even more creative Video Set-Ups during shows.

### Advantages:

- Hidden PA:  
No overhanging sound systems
- Reduced back support:
  - Lighter and more compact Truss system
  - Reduced transport volume and weight
  - More shallow back structure makes room for audiences

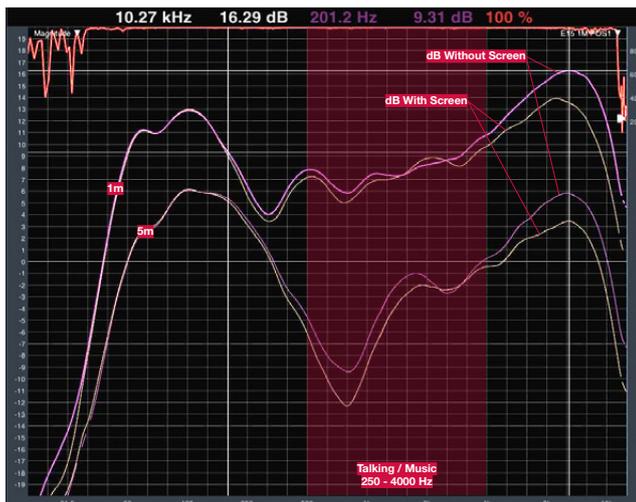

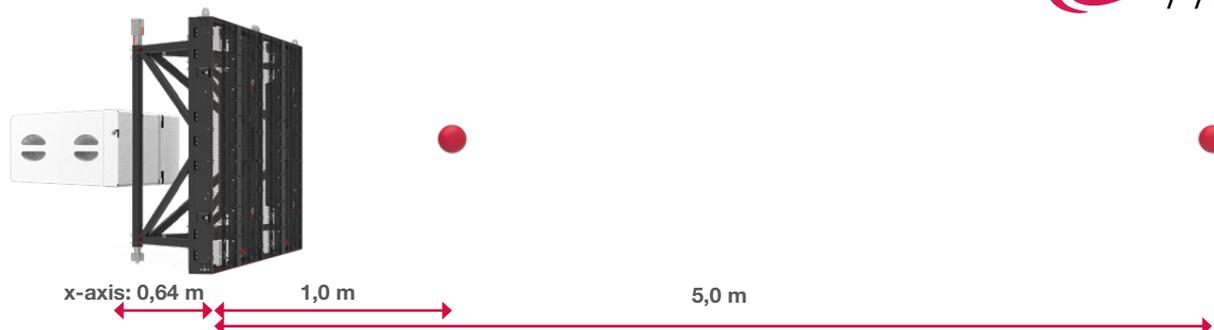

### Specifications:

- 70% Transparency (Contrast Enhancer Available)
- Built-In Wind Bracing
- High Wind Load
- Easy transportation and installation
- IP65 Protection
- High Brightness
- Modular Design
- Easy Maintenance

### Technical Details:

- Dimensions:  
1200 x 1200 mm  
47.24 x 47.24 inch
- Pixel Pitch:  
8.33 mm
- Weight:  
33 kg / 102.17 lb
- Concave and Convex up to 15°
- 50% Wind Pressure Reduction

## Official Test by Adamson with an Adamson E15 Speaker:

Center of PA aligned between LED Tile Junction and Data and Power Supply.

y-axis: 0,9 m

**Indochine Tour 2022**

**Soundstorm 2021**

Based on the concept of Nicola Sirkis', singer of the band, PRG France and PRG Projects cooperated to make his dream a technical reality. In response to Nicola Sirkis' ambition, a 360° tower was to be equipped with a custom LED screen, specifically developed and manufactured for the Indochine tour, which was transparent and windproof, thus providing a solution that masked the entire sound & lighting system. To date, no event technology provider has succeeded in creating a tower that projects lighting effects while hiding the Light & Sound kit from the audience. Our innovation allows the spectators to be totally immersed in the shows imagined by the artists.

Soundstorm 2021 roared back into the Saudi Arabian capital and PRG provided 360° technology for Big Beast, the main stage. In addition to light and audio, PRG delivered the record-breaking, continuous screen comprised of over 4,000 sqm of LED, and around 70 million pixels. For the screen's centre, PRG supplied 2,200sqm of its brand-new Titan-X panels which were developed by PRG and Infilled this was supplemented with ROE MC-7H for the mid wing sections, plus ROE CB5 for the DJ Riser.
