

VIRTUAL PRODUCTION STUDIO

at PRG Los Angeles

Our Virtual Production Studio in Los Angeles features the most advanced independent in-camera visual effects volume stage with a curved LED wall, LED floor, mobile LED walls and an automated LED ceiling. It has hosted a range of productions including feature films, scripted TV, award shows, corporate events, music videos, livestreamed concerts and commercial shoots. Services includes AR/xR capabilities, a separate green screen studio, Enhanced Environments car process and L-ISA Immersive Hyperreal Sound technology. Restrooms, separate kitchenettes, talent dressing rooms, production overflow space, and flexible workstations are available to accommodate large crews and productions. Watch our [sizzle video](#) to see work we've helped produce.

BRAIN BAR: THE NERVE CENTER FOR VP

- EPIC approved native Unreal workflow living alongside Disguise and stYpeland workflows
- nDisplay works with Unreal Engine to render 3D content simultaneously to multiple displays in real time
- Workstations for real-time image display, camera tracking, LED output, real-time color grading / compositing and camera switching

NCAM

- NCam Reality is a 'one-size-fits-all' hybrid camera tracking solution for all sorts of VP scenarios
- This patented technology combines natural markers, reflective markers, and fiducial markers- making it the perfect choice for any environment
- Can be tracked handheld, Steadicam, crane, a dolly or on a gimbal, both indoors and outdoors

MO-SYS

- Perfect for use with [Enhanced Environments](#), Mo-Sys Cinematic XR Focus allows for seamless focus pull from real foreground objects to virtual assets placed deep within the scene
- Mo-Sys VP Pro XR is a pre-configured, multi-node nDisplay XR server system, designed specifically for final pixel XR shooting for cinematic projects

CONTENT: ALL OF IT NOW

- Our in-house partner, All of it Now, is a creative agency capable of creating photorealistic environments and stylized sets
- Realtime rendering techniques allow for performer interaction and camera responsiveness without a lengthy post production process

MOBILE PRODUCTION UNIT

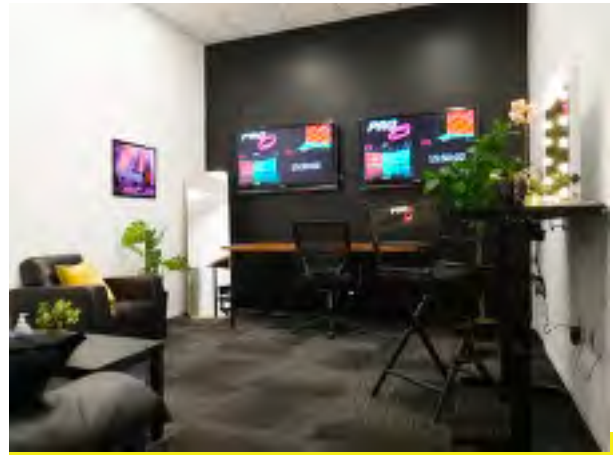

- Our mobile production unit is custom configured and comes complete with equipment and crew
- Bring everything above to any location, anytime for any production
- Provides support for virtual production or standard playback jobs outside of the studio
- Can be deployed to any North American location
- Get the specs [here](#)
