SOFTWARE RELEASE NOTES

INTRODUCTION

Mbox Software Version 4.0.1

Software version 4.0.1 is now available for the Mbox Media Server applications including Mbox Designer, Mbox Studio, Mbox Mini, Mbox Director, and Mbox Remote.

Overview

Software version 4.0.1 offers several notable bug fixes for issues in Mbox, Mbox Director, and Mbox Remote. A list of affected items can be found below.

Mbox:

+ Fix Output Master Shutter drawing origin
+ Fix issue affecting use of TC Reader stream when Audio input is set to "None" at launch
+ Add missing txfx file for Effect #188
+ UI fixes on Outputs/Mixes tabs when using dropdown menus
+ Fix crossfades on Layer Copy FX+ receivers
+ Fix issue with black flash when first applying an effect to an Output Master
+ Correct Multiscreen stride value interpretation
+ Fix sub-output vertical sizing when an effect is applied to that sub-output's Output Master
+ Fix issue with crash upon releasing QC file
+ Allow mulitmodels to automatically reload when one of their component models is edited
+ Restore Strobe effect for use on Image Remapping screen objects
+ Fix issue with up/down direction for some effects in El Capitan (10.11.4+) and Sierra (10.12)
+ Fix issues relating to Image Units when frame blending is applied after a playspeed reduction
+ Fix issue when chaining some effects due to image size/center changing as effect values are modified
+ Fix for intermittent fullscreen flicker in Sierra
+ Fix HUD layer status values when using more than 19 layers

Director:

+ Fix OSC interactions with Output Masters
+ Fix issue with crash when Feedback All Layers is enabled and feedback is received
+ Add Effect #189 to profiles
+ Fix values for Global Master HUD/Macro popup
+ Fix crash on drag/drop to server

Remote:

+ Now uses localhost (127.0.0.1) when local IP Address is detected
+ Fix for Content Management thrashing on bad Ethernet connection
+ Correct vignette curve names and ordering

Multiscreen Editor:

+ Increase read frequency to allow faster loading of large configurations
