# SOFTWARE RELEASE NOTES

**Product:** V676 and V476 Control Consoles
**Manufacturer:** PRG
**Subject:** Vx76 Software Version 3.1
**Bulletin No:** VX76-005
**Date:** May 7, 2012

## INTRODUCTION

### Vx76 Software Version 3.1 Overview

Software version 3.1 is now available for the Vx76 Control Consoles. This is a maintenance with no new features.

### Corrected Issues

+ Submaster priority is not ignored when using pan/tilt presets in effects.

+ Errors in Patch spreadsheet no longer prevent users from deleting channels.

+ Highlight does not lose selection on exit and now uses group divisions.

+ Importing a patch correctly causes luminaire download consistently.

+ Fixed issues with the Patch spreadsheet and multiple edits, and improved performance in general for the window.

+ Pressing Group plus a set number will select all channels in the set.

+ Intensity window will now store auto-follow preferences in snapshots.

+ System configuration shows correct information on primary and secondary consoles.

+ Storing a new group with a pile-on selection of multiple groups will retain divisions.

+ Group ordering is no longer lost when changing channel selection.

+ Command line syntax for main cue stack (Cue 0-n) has been added for going into and storing into the main cue stack, and using selective recall.
